

We would appreciate if you would not consider lowering the standards on the Indiana's Telephone privacy law. We are receiving up to 12 calls a day and that's just what is on the caller ID when I get home from work. Usually we receive another 3-5 calls an evening and even Sunday's. I'm looking very forward to when our registering for this will take effect the first of the year. These calls are a pain and very annoying. Once again please do not lessen the law if anything it could be even tougher. Thank you!
